

Undergraduate Colloquium

Title: Mathematical Skills in Business

Speaker: Christina Negley (Pinnacle Actuarial Resources, Inc.)

Time: 4:00 pm - 5:00 pm on Thursday (10/15/20)

Zoom meeting ID and password:

<https://illinoisstate.zoom.us/j/95101934750?pwd=T0pDQTFJRmV2YjcZdm1yRFJiZHZVQT09>

Meeting ID: 951 0193 4750

Passcode: MATHCOLLO

Abstract:

Far too often, the study of mathematics is considered abstract, almost irrelevant in everyday life. Yet the skills required by a degree in mathematics are highly coveted in the business world. Join us to discuss how these skills are manifested particularly in actuarial science but also in other business arenas.

About the Speaker:

Christina Negley is a consulting actuary with Pinnacle Actuarial Resources in the Bloomington, Illinois, office. She holds a master's degree in mathematics from Illinois State University and bachelor's degree in mathematics from Cedarville University in Cedarville, Ohio. She began work in the property/casualty insurance industry in 2014.

Ms. Negley has experience in assignments involving loss reserving, funding studies, loss cost projections, and captive feasibility studies. She has provided support for loss reserve analyses for commercial insurers and self-insured groups (including governmental entities) in general liability, workers' compensation, auto liability, auto physical damage and medical professional liability coverage. She has also participated in research and analyses involving medical professional liability programs and predictive modeling for personal lines insurance.
